

Newly development in galvanizing process for protection against atmospheric corrosion and exterior erosion which is finished with heavy duty galvanized protection both inside and outside the conduit pipe (Class 4 - Heavy protection both inside and outside - refer to BS 4568: Part 1: 1970)

Features

1. High quality conduit

ELPRO® conduit is rolled, welded, cut and threaded in one continuous automated process for uniform high-quality conduit.

2. High quality galvanization

All ELPRO® conduit must pass some pre-treatment test in order to eliminate all spot and rust before galvanized.

3. Heavy duty galvanized protection - Class 4

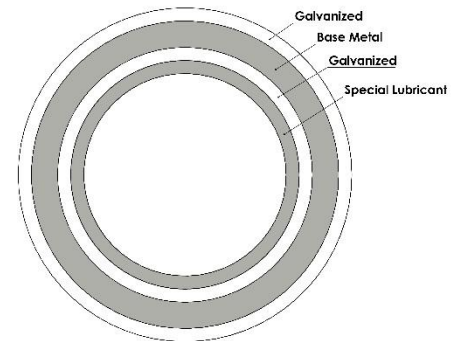

ELPRO® conduit is well protected by pure zinc coating on both inside and outside walls to protect conduit from corrosion.

4. Easy wire pushing and pulling

ELPRO® conduit has very smooth inside wall which is coated by a special lubricant and pure zinc to make wire pushing and pulling easy.

5. Money back guarantee

ELPRO® conduit is made of high-quality steel and processed by high frequency induction welding. We give you 100% money back guarantee if there is any flattening and/or splitting of our conduit (in normal condition).

THREADED CONDUIT C (THIN WALL)

JIS C 8305
